

DATASHEET Thermal Protector S09

Type series 09

Construction and function

Switchgear consisting of a movable silver contact (1), a contact bearer (2), a spring snap-in disc (3) and a bimetallic disc (4) which is riveted into one another, undetachable and fixed in a positive lock and self-aligning between a conductive, heat-transferring housing (5) and a contact cap made of steel (6) that is insulated from it, plus a stationary countercontact (7). At the same time, the switchgear is held open by the spring snap-in disc (3) used as a transfer element for electric current which is held between a supporting collar and a circumferential ring. As such, the bimetallic disc (4) underlying it, that is also stuck out from the movable contact (1), can continuously work (exposed) by mechanical loads. As soon as the bimetallic disc (4) reaches its rated switching temperature, it effectively springs against the throw force of the spring snap-in disc (3) into its inverted position. The contact is abruptly closed. The spring snap-in disc (3) is now a transfer element for electric current and as such, it enables the bimetallic disc (5) to continue to work on a continuous basis. When the spring back temperature is reached, the bimetallic disc snaps back into its start position and the contact is opened again.

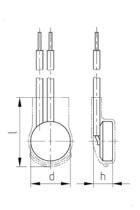

Features:

Small dimensions	suitable for mounting into and onto windings
Quick response sensitivity	featured by small protector mass and the metal-housing
Excellent long term performance	due to instantaneous switching, fine-silver contacts, constant contact resistance and to electrically as well as mechanically unstressed bimetallic disc, reproducible switching temperature values
Very short bouncing times	< 1 ms
Instantaneous switching	always with the same contact pres- sure up to reset point; resulting in low contact stress
Temperature resistance	by use of high temperature resistant materials and components

19,0 mm	1 0	herr e 15	nik 0os	

11,7 mm

Diameter d	11,7 mm
Installation height h	from 5,4 mm
Length of the insulation cap I	19,0 mm

Type: Normally open; resets automatically; with connector cables; with or without epoxy; insulation: Mylar®-Nomex®				
Nominal switching temperature (NST) in 5 °C incre	50 °C - 180 °C			
Tolerance (standard)		±5 K		
Reverse Switch Temperature	UL	≥ 30° C (≤ 75° C NST)		
(defined RST is possible at the customer's request)		-30 K ± 15 K (≥ 80° C ≤ 180° C NST)		
	VDE	≥ 35 °C		
Installation height		from 5,4 mm		
Diameter		11,7 mm		
Length of the insulation cap		19,0 mm		
Resistance to impregnation *		suitable		
Suitable for installation in protection class		I + II		
Pressure resistance to the switch housing *		300 N		
Standard connection		Lead wire 0,5 mm ² / AWG20		
Available approvals (please state)	IEC; ENEC; \	/DE; UL (appr.≤ 180°C); CSA; CQC, CMJ		
Operating voltage range AC		up until 500 V AC		
Rated voltage AC		250 V (VDE) 277 V (UL)		
Rated current AC $\cos \varphi = 1.0$ /cycles		6,3 A / 10.000		
Rated current AC $\cos \varphi = 0.6/\text{cycles}$		4,0 A / 10.000		
High voltage resistance		2,0 kV		
Total bounce time		< 1 ms		
Contact resistance (according to MIL-STD. R5757)		≤ 50 mΩ		
Vibration resistance at 10 60 Hz		100 m/s ²		
		-		

More varieties of the type seriese 09:

- L09 with connector cables; with epoxy; fully insulated in a screw on housing
- C09 with connector cables; with or without epoxy; without insulation
- F09 with connector cables; with epoxy; fully insulated in a Nomex® cap
